

DREW WHITE

(317) 526-6081 | drew.white087@outlook.com | <https://www.linkedin.com/in/drew-white1/> | drew-white.site/

EDUCATION

Indiana University, Luddy School of Informatics, Computing, and Engineering Indianapolis, IN
Bachelor of Science in Computer Science – *Minor in Applied Data Science* Expected May 2027
Dean's List: Fall 2025, Spring 2026 GPA: 3.90/4.00
Certificates: Certificate in Software Application Developer, Technical Certificate in Software Development

WORK EXPERIENCE

Software Engineer Intern May 2026 – August 2026
Eli Lilly and Company Indianapolis, IN

- Engineered a full-stack React/FastAPI application, reducing return time and saving 70+ hours annually.
- Built Python REST APIs with PostgreSQL and ServiceNow integrations to automate device-return flow.
- Implemented CI/CD with GitHub Actions, Argo CD, and CATS for automated deployment.

Technician October 2023 – January 2024
High Power Technical Services (Dish Network) Morristown, IN

- Configured and troubleshooted routers, satellite systems, and smart-home devices to 30+ sites per week.
- Diagnosed network, hardware, and connectivity issues while increasing installation efficiency by 15%.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, C++, Kotlin, HTML, CSS, TypeScript
Frameworks/Libraries: React, Node.js, Express.js, Socket.IO, PyQt5, Django, Jetpack Compose
Databases/Tools: SQLite, MySQL, PostgreSQL, REST APIs, JSON, ESLint, PostCSS
Development Software: Git, GitHub, Visual Studio, Android Studio, Figma, Vercel

PROJECTS

Portfolio | Full-Stack | Next.js, React, TypeScript, Tailwind CSS, Vercel August 2026 – Present

- Architected a virtual filesystem abstraction that drives four synchronized interfaces in a portfolio.
- Built a dependency-free in-browser terminal emulator, plus a hand-rolled JSON syntax highlighter.
- Set up Git/GitHub version control with CI/CD auto-deployment to Vercel

Blokus Board Game | Full-Stack | JavaScript, React, Node.js, Socket.IO April 2025 – October 2025

- Developed a real-time multiplayer Blokus game with server-side validation and client synchronization.
- Implemented piece rotation, flipping, and visual previews to improve gameplay and accessibility.
- Designed a responsive UI with React and Socket.IO for smoother player interaction.

Traffic Simulator | Full-Stack | C++, SFML, OOP June 2025 – August 2025

- Engineered a real-time traffic simulation in C++/SFML with dynamic vehicle spawning and movement.
- Implemented finite-state traffic signals, collision-aware stopping logic, and synchronized intersections.
- Modeled multi-lane vehicle behavior and U.S. traffic patterns using object-oriented simulation architecture.

LEADERSHIP/AWARDS

Eli Lilly and Company Hackathon – Most Creative Award June 2026
BDPA Indianapolis Hackathon – First place and Best Design Award November 2025
Eli Lilly Career Planning Conference CTF – Second place October 2025
